

Senior Software Engineer (iOS)

github.com/Shohan-Pramanik
linkedin.com/in/shohan-pramanik

SUMMARY

Results-driven iOS Developer with **4+ years** of experience designing and delivering high-performance, user-centric mobile applications. Proficient in **Swift**, **SwiftUI**, and **UIKit** with deep expertise in clean architecture (**MVVM**, **MVVM-C**), real-time systems, and **SDK development**. Proven track record of shipping production apps to the **App Store**, integrating complex third-party services, and collaborating across cross-functional remote teams. Passionate about scalable code, intuitive UI design, and continuously adopting emerging iOS technologies to deliver impactful solutions.

WORK EXPERIENCE

Senior Software Engineer(iOS) **September 2025 — Present**
Star Connect, JXC Business Tower, Bashundhara, Dhaka

- Engineered real-time messaging system using **WebSocket** and **Pusher**, enabling instant communication with low-latency message delivery across multiple users.
- Developed end-to-end video calling functionality using **Agora SDK**, supporting both one-on-one and group call experiences with optimized audio/video quality.
- Architected dynamic call management system handling group and individual calls, including call routing, participant management, and session lifecycle control.
- Implemented **Dynamic Notifications** and **Deep Linking** to enhance user engagement and seamless in-app navigation.
- Developed a **social feed** system enabling users to create, interact, and manage connections in real time.
- Integrated centralized **payment gateway** supporting secure transactions, streamlining in-app purchases and subscription management across the platform.

Software Engineer(iOS) **October 2023 — August 2025**
Gakk Media, West-Panthapath, Dhaka

- Built custom **MapKit** interface with live location updates and custom annotations.
- Developed and optimized features for iOS **apps and SDKs**, improving performance and maintainability across multiple products.
- Implemented complex UIs from Figma, including **Tinder-style swipe** and **carousel views**, delivering pixel-perfect designs with smooth animations.
- Created custom **Audio/Video Players** with advanced UI controls, supporting seamless media playback experiences.
- Integrated third-party APIs and libraries using **CocoaPods** and **SPM**, expanding app functionality efficiently.
- Managed **App distribution** via **TestFlight** and **App Store**, ensuring smooth release cycles and compliance with Apple guidelines.

Junior iOS Developer **October 2022 — September 2023**
MyMedicalHub International, Uttara, Dhaka

- Collaborated with senior developers to design and implement new features for iPhone and iPad applications, contributing to on-time product delivery.
- Assisted in debugging, testing, and refining code to ensure high-quality app performance and an optimal user experience.
- Gained hands-on experience with **Swift** and **Xcode**, applying industry-standard iOS development best practices in a production environment.
- Integrated third-party libraries to extend app functionality and improve overall application capabilities.
- Strengthened cross-functional collaboration through regular code reviews, idea sharing, and feedback sessions with the development team.

SKILLS

- **Languages & Frameworks:** Swift, SwiftUI, UIKit, Combine, WidgetKit, StoreKit, MapKit, Core Data, Core Location, AVFoundation, Core ML, Push Notifications (APNs).
- **Architecture & Patterns:** MVVM, MVVM-C, MVC, SOLID principles, Clean Code, end-to-end SDLC.
- **Networking & SDKs:** Alamofire, RESTful APIs, WebSocket, Pusher, Agora SDK, Firebase, JSON.
- **Auth & Payments:** Sign in with Apple, Google, Facebook, In-App Purchases (one-time & subscriptions), Sandbox testing.
- **Tools & DevOps:** Xcode, Git, GitLab, SourceTree, XCTest, TestFlight, App Store, Figma, SQLite3, CocoaPods, SPM.

PROJECTS

StarConnect — Ask & Connect September 2025 — Present

- Built a **professional networking app** featuring social feed, connection requests, and role-based user profiles.
- Engineered real-time **one-on-one and group video/audio calling** using **Agora SDK** with seamless call management.
- Implemented **instant messaging** with **WebSocket** and **Pusher**, supporting real-time chat with message history.
- Developed dynamic **social feed** with post creation, reactions, and comments for professional community engagement. [AppStore link](#)

Deen: Quran Hadith Prayer Time October 2023 — Present

- Full-featured Islamic app with **Quran** (20+ reciters, translations, Tafsir), **Hadith**, **Dua**, **Prayer Times**, **Qibla**, and **Ramadan** tools.
- Offline access via **Core Data & FileManager**; monetized via **In-App Purchases**, Card, and MFS payments.
- Built white-label **SDK** adopted by **Grameenphone (Ibadah)** and **Banglalink (BL Islamic)**. [AppStore link](#)

EMMA Health October 2022 — September 2023

- Health assessment platform generating **AI-driven reports** predicting future health conditions based on medical history and guided exercises.
- Integrated **OpenTok (Vonage)** SDK for real-time telemedicine video sessions with role-based access for doctors and patients. [AppStore link](#)

EDUCATION

Degree	Institution	Board	Result	Year
B.Sc. in CSE	University of Rajshahi	N/A	CGPA: 3.54/4.00	2022
HSC	Govt. Kamrul Islam College, Rajbari	Dhaka	GPA: 4.58	2016
SSC	Goalunda Proper High School, Rajbari	Dhaka	GPA: 5.00 (A+)	2014
